

VMAXX Wrapplicator

Don't Sacrifice Load Containment!

The Vmaxx Wrapplicator hand dispenser system is an innovation in wrapping technology from Malpack. Using a patented design, our Wrapplicator hand dispenser provides 'machine technology in the hand'. With a wide range of benefits for customers who wrap pallets with hand stretch wrap, this system is the next generation in stretch wrapping technology.

Ergonomic design

The Wrapplicator is used with one hand and is designed to allow the operator to walk forward around the pallet to dispense the film in a natural position. No bending or stretching is required, thus reducing the risk of any health and safety concerns.

Optimum wrapping

The Wrapplicator incorporates a series of pre-stretch gears within the dispenser, meaning the film dispenses at the optimum elastic point. This minimizes the risk of over-stretching (which can lead to the stretch film breaking) or under-stretching (which means more film is being used than necessary and no cost benefit is achieved).

Wrapplicator Light

Item#	Description	Weight	Bulk Pack	Cs/Plt
VXW406L450	40.6cm x 450m	2.46	180	
VXW406L450BX	40.6cm x 450m	9.84		40

Wrapplicator Medium

Item#	Description	Weight	Bulk Pack	Cs/Plt
VXW406M450	40.6cm x 450m	2.74	180	
VXW406M450BX	40.6cm x 450m	10.96		40

Ergonomics & Safety

- **No bending or stretching required**
- **Walk forward and not backwards**
- **Reduce the likelihood of pallets collapsing during transit or on an operator**
- **Reduce stress through the back by 50%**
